

Stormwater Pipe on Sloane's Beach

The Auckland City Council is seeking consent to build a large stormwater pipe on this beach.

This pipe will

- *discharge untreated road runoff into a popular swimming area,*
- *increase beach erosion, and*
- *have a major impact on the amenity values of the beach.*

A notice calling for submissions on this proposal is posted down at the beach.

Help us stop the pipe. Please take one of our submission packs containing:

- A completed submission opposing the pipe – just add your contact details
- A blank form for your own submission
- Instructions for posting/faxing your submission

This beach is a valuable community asset. Your submission can help preserve it for future generations.
